Product Description

Rayco RG55 Stump Cutter

The RG55 features a gasoline Kubota engine, 4-wheel drive, and a hydraulic backfill blade. Operators appreciate the large cutting dimensions as well as the visibility and protection of the swing-out control station. For travel through gates, the control station swings in line. Wide floatation tires and 4-wheel drive allow the RG55 to maintain traction in challenging conditions. A hydraulic backfill blade saves time during clean-up, letting you get on to the next job. Wireless remote controls are available on the RG55R.
