Product Description

GiANT Loaders - G5000 Compact Wheel Loader

The Giant G5000 is equipped with a strong 4 cylinder 75 HP turbo charged Kubota diesel engine with a catalyst (DOC) and particulate filter (DPF). This machine features a standard 2-speed gearbox and heavy planetary final drives that deliver a high pulling force, quick acceleration and a top speed of 12.4 mph. An optional additional 2-speed gearbox provides extra pulling force and a travel speed up to 21.6 mph. The Giant G5000 can be equipped with an optional heated cab with AC, that offers a spacious and comfortable working environment. Available high flow hydraulics, a large choice of tire options and optional traffic lights make this machine a great fit for fertilizer operations, snow removal purposes, landscaping, construction or farming. The G5000 comes with either a Z-bar boom or an X-Tra boom configuration that offers more visibility and a higher lift capacity.
