### Product Description

## BCS America Model 722E Two Wheel Tractor with Electric Start 821CT280

In addition to all-gear drive and the advanced handlebar system like that of the 718, the model 722 is the most popular of the Straight Axle tractors and features:

- **More Horsepower:** Powered by Honda's GX240 engine, the 722 can accommodate both the same and **larger versions of the attachments suitable for the 710 and 718**. These include the 26" Tiller, 45", 47" & 51" Sickle Bar Mowers, 28" Snow Thrower, and 40" Power Sweeper. Plus, the 722 can accommodate a wider range of attachments that include the Chipper/Shredder, Log Splitter, 40" Snow Blade, 36" Dozer Blade, and Utility Trailer.
- **Larger Wheels:** The larger diameter wheels and tires provide added traction, stability, and ground clearance when operating on uneven terrain.
- **An Electric Start option:** In life, there are long term investments and then there are long, *long-term* investments. BCS is the latter, and the convenience and ease of turning a key, rather than pulling a rope, might well be appreciated at some future time (if not right away). Honda's electrical system is high quality and complete; the engine recharges the 12V battery as it runs. And the recoil starter is always present as a backup, if needed. Just remember: because it is a different engine, electric start **cannot be added later** to the standard, recoil start model.

### FEATURES
