Product Description

BCS America Model 710 Two Wheel Tractor 821K0180

The 710 is lightweight, compact in size, and loaded with BCS quality. Designed for decades of dependable service, its all-gear driven transmission, automotive-style clutch, and powerful Kohler CH270 Command Pro engine make this a great investment for those interested in a basic range of attachments. Because the engine's power is not lost due to the inefficiency of belts, the tractor comfortably handles an 18" or 20" Rear-Tine Tiller, Hiller/Furrower, 30" or 40" Sickle Bar Mower, 24" Snow Thrower, Water Transfer Pump, and more.

In the family garden, the 710 with tiller is a superior, do-everything tool – bust sod, prepare seedbeds, power compost cover crops, create planting furrows, hill potatoes, and cultivate between rows to eliminate weeds!

For the commercial market garden, the 710 is great for cultivating – no untilled strip in the center of the row and a maximum working speed of 1.4 miles per hour.
