Product Description

eXmark 36" Vertex E-Series Stand On Mower

When you need a more productive mower for small to mid-size properties, Vertex E-Series is the right choice. With the operator placed comfortably on a suspended platform between the drive wheels, Vertex E-Series is designed to easily clear gates that would stop larger machines in their tracks. And with speeds up to 7.5mph forward, you'll finish jobs faster, with less fatigue, than you would with a walk-behind mower. Your customers will love Exmark's signature cut quality, and you'll love how fast you got the job done. That's a win-win.
