Product Description

STIHL RZA 760 Zero Turn Mower

From residential areas to commercial landscapes and more, STIHL is bringing professional-grade battery power to wherever pros are taking on the work and getting the job done. Built with the professional user in mind, the STIHL RZA 760 zero-turn mower optimizes every aspect of the mowing experience, maximizing performance and efficiency while minimizing the maintenance that comes with its gas counterparts. A built-in 24 kWh lithium-iron phosphate battery helps deliver up to 8 hours of run time or the ability to cover up to 21 acres on a single charge. And with the versatility to charge on 110- or 220-volt circuits with its included charger, this zero-turn mower can be ready to take the field day after day. Its 60" fabricated mowing deck and ability to reach speeds up to 16 mph means pros don't have to sacrifice durability for efficiency. On top of all the specs pros are looking for, this mower adds comfort and convenience features like a high-visibility touchscreen display, rollover protection with 360° LED illumination, and a premium suspension seat. The STIHL RZA 760 leaves no room for compromise with a professional-grade battery mowing experience that changes the game for pros.

*Run time may vary based on charge level, capacity, model, operating style, and conditions.

This tool is IPX4-rated weather-resistant construction and has been designed and tested for splash water protection.
