Product Description

PS2-500 220V Single-phase Submersible Pump

No matter how large or small the job, Wacker Neuson's single-phase submersible pumps offer the versatility and durability contractors need for light dewatering on the job site. This comprehensive family of pumps offers big pump features for a small pump investment.

Features:

- These high performance single-phase submersible pumps are capable of handling solids up to .4 inches, ideal for job sites needing fast dependable dewatering.
 - Lightweight, compact design with heavy-duty strain relief power cord offers a highly durable pump that is still easy to transport and install.
 - Built-in thermal protection prevents motor damage due to impeller blockage, reducing service repairs.
 - Silicon carbide-faced double mechanical seals run in an isolated oil-filled cavity, allowing for seal lubrications, cooling and overall motor protection.
 - PST models feature shaft-mounted agitators which suspend solids when pumping sand and debris. Built with ductile iron hosing for excellent wear life when pumping water with some entrapped solids.
-
