Product Description

50' 30 amp Generator Cord 6329

Designed for use with manual transfer switches and power inlet boxes, this heavy-duty, all rubber power cord connects a portable generator to the power inlet box or manual transfer switch. Product Details: 10-gauge, 4-wire, 125/250 VAC power cord for portable generators. Plug connects to generator, and receptacle connects to power inlet box or transfer switch. Thermoplastic weather resistant rubber remains flexible even in subzero temperatures.
