Product Description

Maruyama MHM480 Hover Mower

The Maruyama MHM480 Hover Mower is the latest in the lineup of commercial-grade cutting tools designed for the professional. Powered by the Maruyama CER800 engine for unsurpassed performance and hover technology allowing for utilization in areas not capable by traditional lawnmowers.

Excellent maneuverability, superior hovering, exceptional mulching, and the ability to operate at the steepest of angles are just a few features that the MHM480 contains. Utilizing a 79.2 cc, 2-cycle gasoline engine provides the user the ability to run for extended periods and maximizes the opportunity for use on difficult terrains. This mower is ideal for steep slopes and hard-to-trim uneven areas where traditional mowers cannot perform such as bunkers, embankments, landscaping privacy mounds, marshes, along water lines, bar ditches, and more.

MAIN FEATURES
